Elements

The element symbol for hydrogen is

H

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The second most abundant element in the Universe is

He

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The element symbol for lithium is

Li

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The element symbol for carbon is

C

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The element symbol for nitrogen is

N

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The element symbol for oxygen is

O

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The element symbol for lead is

Pb

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The element symbol for uranium is

U

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

Ca is the element symbol for

calcium

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

Ne is the element symbol for

Neon

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

Mg is the element symbol for

Magnesium

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

Na is the element symbol for

Sodium

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The most abundant element in the body by mass is

Oxygen

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The most abundant element in the body by # of atoms is

Hydrogen

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The three elements that are found in the human body in the greatest quantity are

H, O, C
Correct: move ahead 2 space
Wrong: stay where you are

Elements

A substance composed entirely of atoms with identical atomic numbers is called an

element
Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

A tiny, chemically indivisible particle made up of protons, electrons and sometimes neutrons.
Atom
Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The most abundant element in the universe is --

H

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

In C_{12}, the 12 refers to what --

Mass number

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The periodic table of elements is arranged how.
By increasing atomic number

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The second most abundant element in the universe is

Li

Correct: move ahead 2 space
Wrong: stay where you are

Elements

An isotope of an element is determined by its number of

neutrons

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

The most stable of all heavy elements is

Lead

Correct: move ahead 1 space
Wrong: Go back 1 space

Elements

One of the heavy elements that has no stable isotopes

uranium

Correct: move ahead 1 space
Wrong: Go back 1 space
