Thinking of traveling near the speed of light? Here are some things you should know first!
When you travel near light speed, time runs slower for you than for those who stay behind. Don’t miss your dentist appointment!

Can you spot the four differences between the top and bottom images?

answers: The big signs on the building; the signs on the doors; the tree grew; new patio table and chair by the pizza parlor.

Even when moving near light speed, space is BIG! It would take you over a year just to leave our solar system.
Taking a long trip requires a variety of snacks.
